

We must update the Medicare program to include a prescription drug benefit. This bipartisan, comprehensive bill will provide universal coverage to all 39 million Medicare beneficiaries in this country. As you know, Medicare was established in 1965 at a time when prescription drugs were not widely used. These days, drug therapies have replaced overnight stays in hospitals and long convalescence in nursing facilities. In light of this, we must update the Medicare program to keep pace with these scientific and medical advances.

This legislation does many things that other legislative proposals do not. First, it provides universal coverage on a voluntary basis to every Medicare-eligible individual. Second, it is based on a standard insurance model, with coinsurance, a deductible, and a defined stop-loss benefit. In other words, once a senior pays \$4,000 in annual drug costs, our plan covers the rest. Third, the amount of a senior's premium would be directly related to his/her income, on a sliding scale. In other words, the lowest-income senior will receive the greatest subsidy. Conversely, the highest-income senior will receive the lowest federal subsidy.

Finally, this legislation emulates market-based insurance coverage by allowing multiple "pharmacy benefit managers" (PBMs) to contract with Medicare to provide the pharmaceutical benefit to seniors. This would ensure competition in the delivery of this benefit, which means a better benefit and lower prices for consumers. This competition would also prevent the government from "setting" drug prices. In my view, price setting would weaken the ability of pharmaceutical companies to conduct valuable research and development into new drug therapies that one day may cure diseases such as cancer, Parkinson's Alzheimer's, diabetes, and HIV/AIDS.

In sum, I believe our proposal to be one of the most responsible and comprehensive drug bills in Congress. It achieves these twin goals while relieving seniors of the huge burden of high drug bills. Seniors should never have to choose between filling a prescription for needed medication or buying groceries. Sadly, this is often the case today.

This past April, I received a letter from an elderly couple in Rhode Island, with a list of their prescription drug expenses for 1999 enclosed. This couple spent almost \$7,000 in 1999 on these prescriptions. They are living on a fixed income, and told me that their savings are being wiped out by the high cost of prescription medications. In addition, the grandmother of one of my staffers cannot afford Prilosec, which she needs to prevent nausea. She cannot hold down food without this drug. This grandmother has to get her Prilosec prescription from her daughter, who

has it prescribed and then ships it to her mother.

This should not be happening. Our bill will ensure that these seniors will get the prescription medications they need without having to wipe out their personal savings or resort to getting the prescription through a relative.

I urge my colleagues to join us in supporting this important legislation and finally provide this necessary medical coverage to our nation's seniors.
